- Storage Management
- Delivery Scheduling
- Route Mapping & Optimization

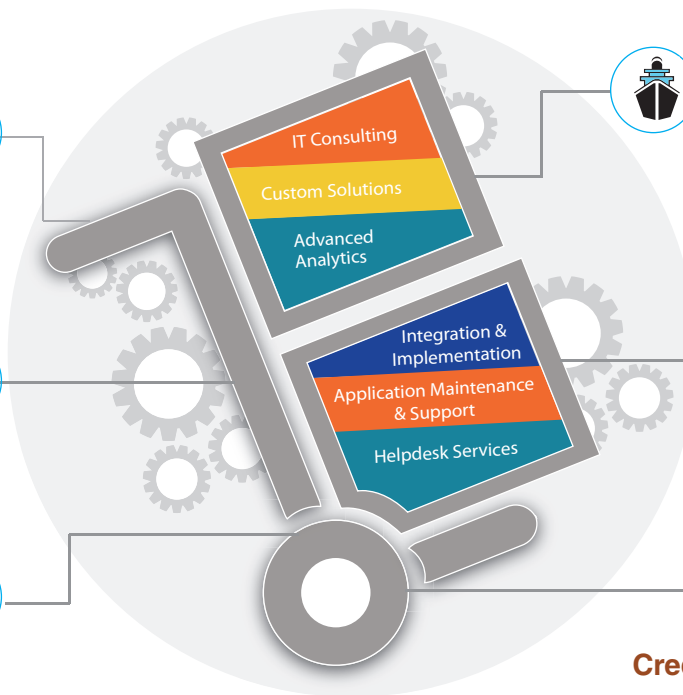

Sustainability

- Paperless Environment
- Resource Optimization
- Cost Reduction

Credit Review Management

- Automation of Credit Review
- Paper-less Environment (Digitization)
- Accounts Receivables Tracking

A Few Solutions to Logistics Challenges

Global Tariff Codes Data Management solution that automates the process of assigning the classification codes for raw materials, packaging and finished goods to be shipped across country borders thus streamlining multi country customs and trade compliance requirements.

Freight Lane Rate Management System that supports the ongoing need for creating or modifying lane contracts for ocean shipments.

Automation & Simplification of the **Contracting & Bidding Process** for both new and renewed carriers via a simple, user friendly, web based solution.

Seamless Supply Chain Integration managing all document types required to help ensure smooth execution of material movement resulting in an effective data management approach.

A web based tool that automates the process of **Tracking & Processing Global Shipping requests** and ensures high quality “Shipping Instructions” are provided to freight forwarders.

Digitize and Automate Warehouse Operations and inventory movement of materials between distribution centers and manufacturing production lines to achieve optimal efficiency.

Business Value Created

- Achieve timely Customs Compliance to ensure **“Zero Delays”** in shipments.
- Significantly reduced errors resulting from previously performed manual efforts thus **“Improving Overall Operating Efficiencies”**.
- Significant time savings due to automation resulting in **“Greatly Improved Customer Satisfaction”**.
- **“Major Cost Savings”** achieved by minimizing penalties due to delays in shipments.
- Providing Transparency throughout the Supply Chain process significantly **“Improving Overall Communication and Collaboration”**.
- **“Enhancing the overall Working Relationships”** with employees, external suppliers, consultants and customers.

We are your strategic partner, aligning our solutions with your business goals & objectives

LEADERSHIP

Understanding what needs to be done and doing it right. Initiating conversations focused on business value and opportunity. Leveraging our industry knowledge and cutting-edge capabilities, we bring the right topics, capabilities, and opportunities to the table.

TECHNICAL PROWESS

Beyond broad-spectrum Tool Expertise, we provide impactful Architectures, Frameworks, Use Cases, Solutions, and Roadmaps to cross-industry Fortune 500. Leveraging our End-to-End Advanced Analytics expertise, we help define strategies and deliver impactful, value-driven business solutions.

BUSINESS VALUE

Converting questions into answers, metrics into insights, charts into interactive storyboards, incorporating data science for data-driven insight.

PARTNERSHIP

A cornerstone of our success. Our long standing association with Fortune companies is a testament to the direct partnership, joint focus and effective collaboration we engage in with our customers.
